-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, "the inside of the link", "the lower end of an upper link", "the upper end of the next lower link", all lack antecedent basis. In claim 3, "the ends provided by said split" lacks antecedent basis.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Riess. Riess teaches the claimed invention including: a series of links with inlet apertures at 2 and outlet apertures between tabs 3/4. The links also split at 8 and are hollow so as to allow the supply line to go through both or either side as desired.

3. Claims 1, 2, 4-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Goldman. Goldman teaches hollow links, outlet apertures at 8 with tabs and inlet apertures at 7 for hiding wires 9. The member 10 of Goldman is considered to teach the broadly claimed "threaded bushing" with a side recess in the bushing for receiving the wire or cable 9 and having upper and lower sleeves, i.e., the annular hollow loop.

4. Claims 1 and 5 rejected under 35 U.S.C. 102(b) as being anticipated by Park.

Art Unit: 3725

5. Claims 1, 5, and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Erikson. The member 11 of Erikson is considered to teach the broadly claimed "threaded bushing" with a side recess (the lower end) in the bushing for receiving the wire or cable 9 and having upper and lower sleeves 10 and 12.

6.

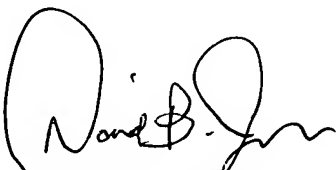

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
